## NEW DISTRIBUTORS

*“New Distributors Set Up with the Correct Advance Curve  
—Choose Points Type or Pertronix”*

Some brand new points-type distributors have appeared in the market place. Apparently, they have been assembled in India from unused parts. Regrettably, it is questionable that the correct advance springs were used. TRF is now having these distributors reworked to have not only the correct advance curves but ones which perform better with modern fuels. We are offering the same distributor with Pertronix electronic ignition conversion. All distributors are set up and tested by an expert on state of the art equipment.

LU40795/RC

Part No.	Description	No. Off	Current Prices on Website
LU40795/RC	<b>Distributor</b> , ignition, Lucas model 25D4, brand new unit, set up and recurved by an expert, TR4, TR4A	1	
LU40795/PTXP	<b>Distributor</b> , ignition, Lucas model 25D4, as above except that a Pertronix electronic ignition kit has been installed, TR4 with positive ground	1	
LU40795/PTXN	<b>Distributor</b> , ignition, Lucas model 25D4, as above except that a Pertronix electronic ignition kit has been installed, TR4A with negative ground	1	

## REBUILT DISTRIBUTORS

*“Maintain the Originality of Your TR4 or TR4A with a Quality Rebuilt Distributor”*

If you prefer to keep your own Lucas distributor, TRF can help by having you distributor rebuilt for you. As is the case with the new units listed above, rebuilt distributors are recurved for use with modern fuels. To arrange to have your distributor rebuilt, call Dave Hagenbuch at 800 234-1104. If we rebuild a distributor for you using a core from our stock a core charge will apply.

### NEW VACUUM UNITS FOR LUCAS DISTRIBUTORS

TRF is now able to supply new vacuum units for your TR4 or TR4A, as well as for many other British cars. These units are replicas of original vacuum units and are perfect for Concours. Each vacuum unit is supplied in a replica of the old Lucas boxes.

The unit listed below is for the Lucas distributor with part number 40795. Each unit is carefully assembled and tested and is coded with the specification of the unit. You can find the part number and the codes stamped into the housing near the vacuum fitting port on your old unit.

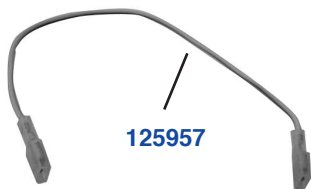

**LU54415328**

Part No.	Description	No. Off Current Prices on Website
LU54415328	<b>Vacuum Unit</b> , advance, code is 2-6-3, fits distributors with Lucas part no. 40795; vacuum unit has connecting spring and push-on fitting	1

Call Level Sales at (800) 234-1104 to inquire about new vacuum units for other Lucas distributors.

## WINDSCREEN WIPERS

If your wiper motor has stopped working, TRF can help. While we work toward stocking each of the motors listed below, the best thing is for you to send your motor to us so that you are sure of getting back the exact type of motor that was fitted to your car. To do this, send your motor to:

The Roadster Factory  
328 Killen Road  
Armagh, PA 15920

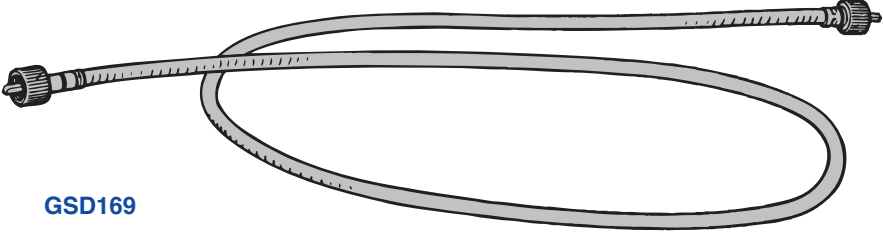

Turnaround time is about four weeks.
