### CARPET SETS FOR TR4, TR4A MANUFACTURER BY THE MAGIC CARPET FACTORY

## The Magic Carpet Factory

### *“Simply the Best”*

#### CARPET MATERIALS

The Roadster Factory offers carpet sets for TR4 and TR4A in materials to match those in which Triumph manufactured the carpet sets when the cars were new.

The TR4 was originally supplied with rayon loop carpet in charcoal grey regardless of interior colour. For concours purposes, this is what you will want to have. In addition, we can supply TR4 carpet sets in rayon loop in black, red, tan, and blue. Rayon is a man-made material and it has less of a shine than nylon loop carpet available elsewhere. Although not used in the TR4, TRF can supply TR4 carpet sets in wool or tufted in a wide variety of colours.

The original carpet material for the TR4A was Wilton wool as listed in the following catalogue sections. As the TR4A carpet pattern is the same as TR250 and TR6, we are also listing carpet sets in the less-expensive tufted carpet as fitted to later TR6 as well as a range of tufted carpet for TR4.

#### WORKMANSHIP

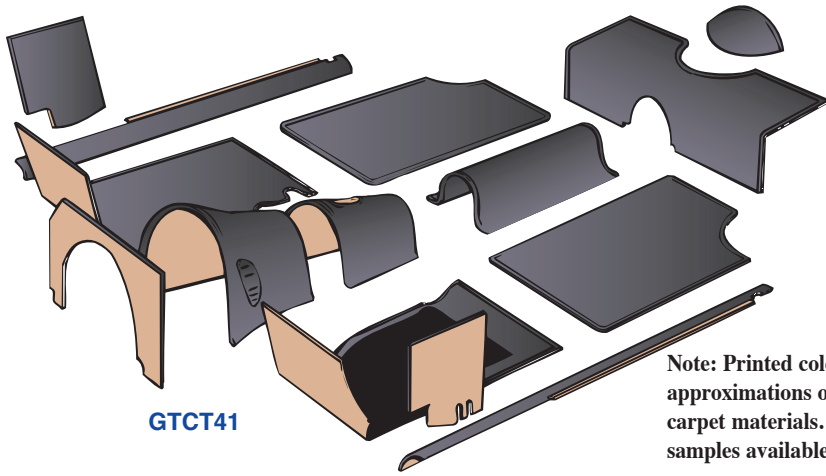

Many interior shops across the country have commented about how much they like carpet sets from The Magic Carpet Factory and how easy they are to fit to cars. There are good reasons for this. Patterns were carefully developed from original carpet pieces taken from original cars. Care was taken to insure that every detail, indeed every stitch, of the original carpet sets was accounted for in the patterns. New carpet sets were then manufactured and refitted to the original cars, and the pieces were adapted to insure that the fit was perfect. Fibreboard backing boards were manufactured for kick panel carpets, as were half-moon rubber protection pads and rubber heel mats. Handbrake boots and handbrake boot grommets were duplicated, and they are hand-tailored onto every carpet set manufactured. In the final analysis, carpet sets from The Magic Carpet Factory include more original details than you get at virtually any interior shop.

#### COLOUR CHOICES

Customer colour choices are available to match any interior colour scheme, and because every carpet set is made especially for every order within a week or two of the time the order is received, virtually any binding colour can be used on any carpet colour. Carpet sets manufactured by The Magic Carpet Factory offer customers the choices they would have at a fine custom trim shop at off-the-shelf prices.

### WOOD DASH PANELS

*“Made at The Roadster Factory by Our Own Chuck Findley”*

If you ever have the opportunity to visit The Roadster Factory, your tour will include the little wood shop at the back of one of the warehouses where our wood working craftsman Chuck Findley produces wood dash panels to factory specifications from scratch. Chuck, who we have affectionately nicknamed “Wood Chuck,” starts by pressing veneer onto marine grade plywood. He cuts each dash panel out using precision templates. After much sanding, a clear coat of finish is applied. Edges and backs of each panel are painted brown as original. The grain on TR4 and TR4A dash panels are book-matched as original. Glovebox doors are carefully fitted using chromed hinges and correct hardware.
