PROPELLOR SHAFT—Propellor Shafts, Universal Joints

Note: The earlier and later shafts may be used interchangeably.

ROAD WHEELS—U.S.A. Models—Fitted Up To Commission No. FM40001 and After FM60006

151539 (UP TO FM95001)
 PKC518 (AFTER FM95001)

ZKC2544(20)

Part No.
 WT3/4SS

Description
Wheel Trim Ring Set, aftermarket stainless steel trim rings can be used as an alternative to the original trim rings. Set of 4. Trim rings greatly improve the appearance of any Spitfire!

ROAD WHEELS—U.S.A. Models—Fitted From Commission No. FM40001 to FM60006

Note: From the factory publications, it appears that the details illustrated here were fitted to U.S. Models only from comm. no. FM40001 up to FM60006. For cars with comm. nos. before or after this range, see the preceding illustration

ROAD WHEELS—Wire Wheels

The Roadster Factory stocks genuine knock-off wire wheels to fit Spitfire 1500 models. Conversion to knock-off wheels would require four or five wheels, one set of four adaptors (which bolt onto the existing disc wheel hubs and accept the splined wire wheels), sixteen special nuts which attach the adaptors to the existing studs, four knock-off nuts (either octagon or eared) which attach the wire wheels to the splined adaptors, and one knock-off hammer (a soft metal hammer which is used to knock-on or knock-off the large knock-off nuts which hold the wheels onto the car). If octagon knock-off nuts are selected, then it is also necessary to purchase a special wrench or “spanner” which is used to tighten or remove the octagon nuts. See next illustration for listings of hub adaptors and accessories.

Part No.	Description
WWH45131	Wire Wheel , painted, 60 spoke (4 or 5 required)
WWH45132	Wire Wheel , chromed, 60 spoke (4 or 5 required)

ROAD WHEELS—Wire Wheel Accessories—Hub Adaptors, Knock-off Nuts, Tools

Part No.	Description
142597	Hub Adaptor , RH (2 required)
142598	Hub Adaptor , LH (2 required)
107948	Two-Eared Knock-Off , RH (2 required)
107949	Two-Eared Knock-Off , LH (2 required)
121295	Hexagon Knock-Off , RH (2 required)
121296	Hexagon Knock-Off , LH (2 required)
RW42	Three-Eared Knock-Off , RH (2 required)
RW43	Three-Eared Knock-Off , LH (2 required)
144504	Nut , securing hub adaptor (16 required)
108450	Thor Hammer (smaller size)
C27290	Thor Hammer (larger size)
AHH5839	Knock-Off Spanner , for use with octagon knock-off nuts
WWSB183	Spoke Brush , for cleaning wire wheels

ROAD WHEELS—Panasport Alloy Wheels

STREET, RALLY & RACE WHEELS
Panasport

We originally started handling the Panasport wheels because they vaguely resemble the alloy wheels which were offered by the factory competition department for the TR4 through TR6 range of cars. They are also reminiscent of the famous Minilite wheels which were used on many racing cars of the 1960's and 70's. But, after using them on our TR250 rallye car, we are happy to be handling Panasports because they are Panasports and not just because they resemble something from the past. They are beautifully made, perfectly true, and marvelously strong and light. They come with lug nuts and wheel centers, although we run them without the centers on our rallye car for a racier look. These look quite sharp on a Spitfire!

Part No.	Description
PANSG1355/SVR	Panasport Alloy Wheel, 13 inch x 5.5 inch, silver
